James Warner

Personal statement

Passionate front end developer dedicated to create elegant solutions through the web. After working on several personal projects, my professional goal is to become a full stack developer.

Skills

JavaScript, ReactJS, HTML5, CSS3, Styled Components, React Redux, Sass, Git, NodeJS, Express.

Projects

To-Do - https://bit.ly/to-do-1
- Developed a full stack Todo app leveraging ReactJS, JavaScript and Styled Components to build the the front end, whilst using NodeJS and Express for the back end.
- Created a database in MongoDB connected to the back end which meant users could sign up, log in, and retain their data.

Pokédex - https://bit.ly/pokedex-1
- Built an app that displays the first 151 Pokémon, utilising ReactJS, JavaScript, Styled Components and React Redux.
- Populated the app with data obtained from PokéAPI, an open RESTful API for Pokémon data.

Blog - https://bit.ly/blog-25
- Created an example blog app leveraging ReactJS, JavaScript, Gatsby and Sass.
- Implemented an admin user interface using Netlify CMS.
